

INSTRUCTIONS

A Message from Jane Engelmann

[Welcome to SING HK](#)

KEEP HOLDING ON 2020

A virtual choir for all HK . let's put our voices and hearts together to unite in song.

KEEP HOLDING ON 2020

1. Choose the part best suited to your voice range and experience
2. Listen to your part and practise until you know it really well
3. When you are ready to record, prepare 2 devices (eg.phone/ laptop) One for videoing, one for listening.
4. USE HEADPHONES. Connect your headphones to the device that you are going to listen to the track on
5. Set up your other device to video yourself (or get someone elsp to video you)

IMPORTANT NOTES ON VIDEOING

- 1.Make sure your recording device is held sideways/horizontally)
2. Ensure your head and shoulders are in frame, and that you are well lit. (ie no light behind you)
3. Wherever possible please have a plain background behind you
4. Very important - Record in a quiet place. Any background noise will ruin the recording
5. Look into the camera whilst you're singing
6. There is a "clap" at the beginning of the audio track. Please clap at exactly the same time as this cue as this will help to align the videos more accurately when editing.
7. Upload your videos to the webpage and **save the file with your name and the part your singing, eg, Andrew Spires - part 1**

Both myself and the administrator Andrew both have full time jobs. This project is a side line and just a bit of fun. We apologise if we do not answer your questions or email.

I have arranged the song as best I can and sometimes the notation might not be entirely accurate.

Jane
